

sonante per saltum fit progressus in Consonantiam, ut in sequentibus exemplis videndum est.

Saltus ille tertiæ de secunda Nota in tertiam esse deberet de rigore de prima Nota ad secundam ; in quo casu secunda Nota sextam Consonantiam efficeret, hac ratione :

In qua Hypothesi, si de prima Nota ad secundam diminutio fieret, res ita se haberet :

Cùm autem hac in Contrapuncti Specie Fusis locus non fit, ideo placuit gravibus autoritate Viris primum exemplum, ubi secunda Nota septimam habet, fortassis propter majorem Cantûs concinnitatem ratum habere.

Ultimùm restat monstrare, quomodo penultimus tactus, qui, ut plurimum cæteris plus difficultatis habet, conficiendus sit ; qui, si Cantus firmus in inferiori sit parte, hac ratione constitutus esse debet.
